

I Power Supply

EEPS01 Smart Power

Features

- External lead-acid battery (12V / ≥40 AH) is supported and auto switch to battery in case of AC power cutoff
- The built-in float circuit can always keep the backup battery in optimum status
- Reverse battery polarity indication. When the LED glows red, it shows the positive and negative terminals of the battery are connected to the negative and positive terminals of the backup battery connector on the smart power respectively. In this case, disconnect the backup battery from the smart power.
- Overload or short circuit indication. When the LED glows blue, it indicates overload or short circuit occurs.
- Fan-free design helps reduce noise
- Power cords available for different regions or countries as follows:

Model	Description
EPWCAE01	EU standard AC power cord, 250VAC10A, 1.8m
EPWCAU01	US standard AC power cord, 250VAC10A, 1.8m
EPWCAUK01	UK standard AC power cord, 250VAC10A, 1.8m
EPWCAA01	AU standard AC power cord, 250VAC10A, 1.8m
